@language : Java
```

## Warning !

This tool is only suitable for converting .thm files from Soc sdk to the
Cs/Cop .thm format.

## Use :

Put Soc .thm files into src folder.
After conversion, the resulted .thm files are stored in output folder.

## Note :

* thmParser converses only .thm files stored in "src" folder, if there are
  files of some other type, they are skipped.

* thmParser deletes all files already stored in "output" folder, before
  converting new .thm files.

Think about move resulted files into another location before starting a new
conversion.
